INDUSTRIAL MATERIAL SUPPLY

MATERIAL DIVISIONS

ELECTRICAL SAFETY & IT MATERIALS

UNITED TECHNOLOGY. Material Supply is a fully integrated application designed to close the loop between you and your supplier by supporting the outsourcing of your manufacturing. The system facilitates issuance of component materials to a supplier in conjunction with the placement of a purchase order (PO) for both planned and unplanned assemblies. Material Supply lets you identify outsourced items, generate a bill of materials structure for assembly and issue/track outsourced components until they are returned. In addition, the system's integration with various financial management tools lets you perform financial and audit control functions

ELECTRICAL & INSTRUMENTATION WORKS

United Technology performs several projects in Electrical jobs . From power work to lighting fixtures and for the communication system of the entire building, the company takes note of its step by step process in order to ensure accurate and proper implementation of the project as stated in the drawing and project design. The company regards in its highest priority the safety measures in carrying out its objectives, this is to show to our clients that our company is a customer-driven company and our effectiveness is measured by the satisfactions gained by our clients and partners in the trade. Adopting its service motto, all projects undertaken by the company, were done error-free, for a reasonable price, ahead of schedule and with a maximum satisfaction to its clientele. All these things made possible because of the enduring commitment and dedication of our workforce and with the skills, technical know-how and experiences of our staff. Instrumentation projects require lots of skills and technical experiences in order to successfully carry out the project as designed. With the influx of our highly skilled technicians and well experienced engineers, the company has made remarkable progress in our projects within the Kingdom of Saudi Arabia. . Thus, with their increasing skills and knowledge, our company joins other companies in the kingdom to be the well-sought after company in the field of instrumentation involving jobs on loop checking, cable installation, instrumentation testing, calibration jobs, etc. With the latest version of testing equipments our company have, it enhances more our manpower to sharpen their technical capability
